

TENSON TECHNOLOGIES.

Waterproof. Windproof. Breathable. = MPC™.

We've got your back in terms of function and laminate! We've been on a quest to withstand wind and water since the early 1980s when we at Tenson launched our self-developed MPC (Moisture Permeability Coating) laminate that keeps you dry and comfortable.

Tenson's MPC technology: developed to withstand wind and water since the early 1980's keeping you dry and comfortable no matter what weather mother nature might throw at you.

The MPC laminate causes the rainwater to drain off the garment. At the same time, the condensation / moisture that comes from the body is transported into and through the garment. In other words, MPC allows the garment to "breathe" so it feels comfortable to wear even during demanding activity. Our MPC garments also are taped at seams to add additional wind- and waterproof protection.

Tenson MPC features three performance grades - MPC Extreme™, MPC Plus and MPC:
